8.11.2015

We have a 50 gpm Mobile Water Treatment Unit immediately available and a 250 gpm unit that can be mobilized in a couple of days. A third unit is available if needed. The units use electrocoagulation technology that can be set up underground, if necessary. The units are designed to efficiently treat iron, zinc, lead, copper and other metals. If you have anyone interested-we can start mobilization today.
